

# Dharani Reddyvari

Data Engineer | Data Pipeline Development | Data Quality & Governance  
Fort collins, CO | (970)-391-7267 | [reddyvaridharani05@gmail.com](mailto:reddyvaridharani05@gmail.com) | [LinkedIn](#)

## PROFESSIONAL SUMMARY

Data-driven professional with a Master's degree and 3+ years of professional experience designing and operating SQL and Python based ETL pipelines for analytics and reporting use cases across e-commerce and manufacturing domains. Experienced in ingesting and transforming multi-source, semi-structured data into analytics-ready Snowflake warehouse tables, implementing data quality checks, and documenting schemas, metadata, and source-to-target mappings to support reliable business intelligence and downstream analytics. Strong foundation in Applied Statistics and Data Modeling with a track record of delivering production-grade data workflows in agile, cross-functional environments.

## SKILLS

**Data Engineering & Big Data:** Data Pipelines, SQL based ETL Development, Data Ingestion, Data Quality Validation, Metadata Lineage, Data Warehousing, Data Modeling, Data Solutions, Data Engineering

**Programming languages:** Python, SQL (Snowflake, MySQL, PostgreSQL), Scala, REST APIs, JSON/XML Parsing.

**CI/CD & DevOps:** Jenkins, JIRA (ticket automation), Git, GitHub, Bitbucket, CI/CD Workflows

**Analytics & Statistics:** Power BI, Data Profiling, Feature Engineering, EDA, Predictive Modeling, Diagnostics, Linear Mixed Models, Data Analytics, Data-driven analysis

**Tools & Platforms:** Snowflake, MySQL, PostgreSQL, Redshift, TensorFlow, OpenCV, BeautifulSoup, Selenium, Excel Dashboards

**Cloud Exposure:** AWS cloud (EC2), Cloud-based data handling

## PROFESSIONAL EXPERIENCE

### Dentsu Global Services, Bengaluru, India | Software Data Engineer

Dec 2022 – July 2024

- Built and operated Python- and SQL-based ETL pipelines to ingest, standardize, and transform multi-source e-commerce data into analytics-ready Snowflake tables for 13+ global clients, improving data readiness by 30% and reducing manual effort by 60%, supporting data-driven decisions.
- Implemented reusable ingestion components and data quality validation (null checks, schema validation), improving pipeline reliability and reducing ingestion defects by 25%.
- Collaborated with analytics and business teams to define data requirements, document schemas, and deliver curated, production-grade datasets via CI/CD workflows using Jenkins and Git to support self-service reporting and ad-hoc analysis.

### Dentsu Global Services, Bengaluru, India | Data Analyst

Jan 2022 – Dec 2022

- Engineered automated image ingestion and preprocessing pipelines using Python and OpenCV for sneaker and watch datasets, improving data consistency for ML training by ~40%.
- Developed TensorFlow-based image classification workflows to standardize orientation detection, improving product listing accuracy across client e-commerce platforms.
- Automated image validation and filtering workflows to reduce noisy or non-compliant images by ~30–35%, improving overall dataset quality and reliability.

### Roots Industries India Limited, Coimbatore, India | Data Analyst Intern

Dec 2020 – Jun 2021

- Analyzed manufacturing performance data to identify bottlenecks and downtime drivers, contributing to ~15% reduction in downtime through data analysis.
- Built automated Excel KPI dashboards, reducing manual reporting effort by ~40% and improving turnaround time for operational reviews, demonstrating data-driven insights.
- Delivered trend summaries and performance insights to support plant-level decision-making.

## PROJECTS

- Customer Analytics & Sales Trend Analysis for an Electronics Retailer:** Analyzed 20K+ retail transactions to build analytics-ready datasets identifying customer demographics, product demand patterns, pricing dispersion, and seasonal sales trends; delivered insights supporting inventory planning, upselling, and order-cancellation reduction using R and SQL.
- E-Commerce Customer Churn Prediction (Logistic Regression):** Built analytics datasets from transactional and behavioral data to support customer churn analysis, evaluated models using ROC-AUC and sensitivity/specificity, and identified key churn drivers to inform data-driven retention strategies.
- End-to-End Time Series Data Pipeline for Trend Analysis:** Built an end-to-end time-series data pipeline to ingest, clean, and structure longitudinal datasets; applied state-space modeling to estimate stable trends, assess data quality, and support reliable analytical insights for long-horizon decision-making showcasing expertise in data warehousing and data quality.

## EDUCATION

Masters in Applied Statistics (Data Science spec): Colorado State University, Fort Collins, CO GPA: 3.8 Aug 2024 – Dec 2025

Bachelors in Mechanical Engineering: Coimbatore Institute of Technology, Coimbatore, India GPA: 3.3 Aug 2018 – May 2022
